

# RAKSHITH SRINIVASAN

ASSOCIATE SOFTWARE ENGINEER, AI

## PROFESSIONAL SUMMARY

AI enthusiast with hands-on experience in building RAG systems and AI Ops, with expertise in developing and containerizing AI applications, along with a hands-on experience in Azure services.

## SKILLS

**Programming & Frameworks:**  
Python, FastAPI, FastMCP, LangChain, LangGraph, OpenAI, Google AI studio

**AI / Machine:**  
Deep Learning, TensorFlow, Model Development & Deployment, Generative AI, MCPs, AI skills and workflows.

**DevOps & AI Ops:**  
AI Ops Automations, Github CI/CD Pipelines, LangSmith Monitoring, Ray Serve

**Cloud & Containerization:**  
Azure Services, Kubernetes, Docker, Azure ML studio, Helm-charts, Microservices Architecture, Azure Container Apps

## CONTACT INFO

Address: Bengaluru, KA 560108  
Phone: +919901258435  
Email: rakshithsrinivasan6@gmail.com  
LinkedIn: linkedin.com/in/rakshith-srinivasan-53

## WORK EXPERIENCE

ASSOCIATE SOFTWARE ENGINEER, AI  
*Aptena India | May 2024 – Current*

### AI Insights

- Developed and deployed machine learning models in Azure ML Studio for warehouse inventory demand forecasting, using time-series forecasting (ARIMA, Prophet) and supervised learning techniques.
- Automated data preprocessing, model training, and evaluation pipelines, reducing model iteration time by 40%.

### AI Assistant Chatbot

- Architected and built a Retrieval-Augmented Generation (RAG) platform using OpenAI embeddings, Django REST APIs, and LlamaIndex for AI orchestration.
- Designed, deployed, and managed 70+ AI agents in production, including document ingestion, aggregation, and knowledge retrieval agents.
- Led the migration of 350+ AI agents across multiple enterprise products, improving system scalability and reducing operational overhead by 45% reducing the agent creation process from days to hours
- Worked on end-to-end Azure cloud architecture, leveraging Azure Blob Storage, AKS, Azure Bot Services, Azure Container Registry, Azure Pipelines, and automated CI/CD deployments.

### Appcentral

- Took ownership of DevOps tasks, including promoting applications across higher environments.
- Hands-on experience in building and deploying end-to-end applications using Microsoft Azure services and Helm charts.
- Managed CI/CD workflows and deployment automation for scalable and reliable releases.
- Worked on containerized deployments and environment configuration using Helm and Kubernetes-based workflows.

## EDUCATION

DAYANANDA SAGAR ACADEMY

*Bachelor of Engineering | 2024*

Specializing in Information Sciences.

## PROJECT REPOS

Github Repos:

<https://github.com/rakshith3101>

## FlowSuite

- Built an end-to-end AI-driven product intelligence platform to streamline CI/CD pipelines, bug analysis, and DevOps agility reporting for Product Owners.
- Implemented multi-agent orchestration using LangGraph, with LangChain as the AI core, FastMCP for MCP servers, LangFlow for workflow design, and LangSmith for monitoring.
- Developed a Next.js frontend using Vercel AI and a FastAPI backend, supporting real-time AI workflows.
- Increased deployment velocity by 35% and reduced production issue resolution time by 40% via Kubernetes logs summary and automation.

## Independent Research & Experiments

- Built a BERT-based NLP model using Hugging Face for support case root cause analysis, achieving ~60% classification accuracy.
- Trained models in Google Colab and deployed scalable inference services using Ray Serve.
- Built Generative AI, recommendation systems, and computer vision models using deep learning techniques with TensorFlow.
- Exploring Edge AI systems using model quantization techniques and deploying lightweight AI models on Raspberry Pi.
- Designed a multi-agent Codex-based system to automate Azure infrastructure deployment using Terraform (IaC).
- Smart routing using Claude and sidecar-based architecture using gRPC for a ticketing system.

## MACHINE LEARNING INTERN

*Grid R & D | August 2023 – September 2023*

Designed and prototyped a machine learning model for road anomaly detection using synthetic data.

## PROFESSIONAL ACHIEVEMENTS

- Led my college dance crew, gaining early experience in teamwork, coordination, and driving a group toward shared goals.
- Participated in national-level hackathons and won All India 1st and 2nd prizes for an early cancer detection AI project.
